TRUGRITTRACTION.COM

THE TRUGRIT DIFFERENCE

★ PROUDLY MADE IN THE USA

MEET THE PATENTED TRUGRIT POLY-CARBIDE WHEEL.

The TruGrit® Carbide Grit Camera Crawler Wheel is the world's first polymer carbide grit hybrid wheel, designed to provide maximum pulling power in all pipe types and conditions. Using patented TruGrit® Polymer Carbide Technology, we developed the most innovative aftermarket traction wheel available to the CCTV sewer inspection industry. It delivers the traction varying pipe conditions demand while staying flexible enough to traverse obstacles without damaging the pipe. That flexibility is what sets it apart from the common steel carbide grit wheels on the market today.

TRUGRIT WHEEL · 8" PIPE
TM-8QC-TG

01

It gains traction without damaging the pipe.

02

It keeps gripping as it wears, because the carbide grit runs all the way to the hub.

03

It fits all major crawler brands with reusable TruGrit hub adapters.

CHOOSE YOUR GRIP

LOOK FOR THESE TAGS ON EVERY PRODUCT PAGE

WHEEL

TruGrit® Wheel

Our patented polymer carbide hybrid grips in every pipe type and gets better as it wears.

STEEL

TruGrit® STEEL

Solid steel wheels carry a carbide grit coating, and we can resurface worn ones with new grit.

SPYKE

TruGrit® SPYKE

The Spyke is the world's first solid steel carbide spiked wheel built to fit multiple crawler brands.

TPU

TruGrit® TPU

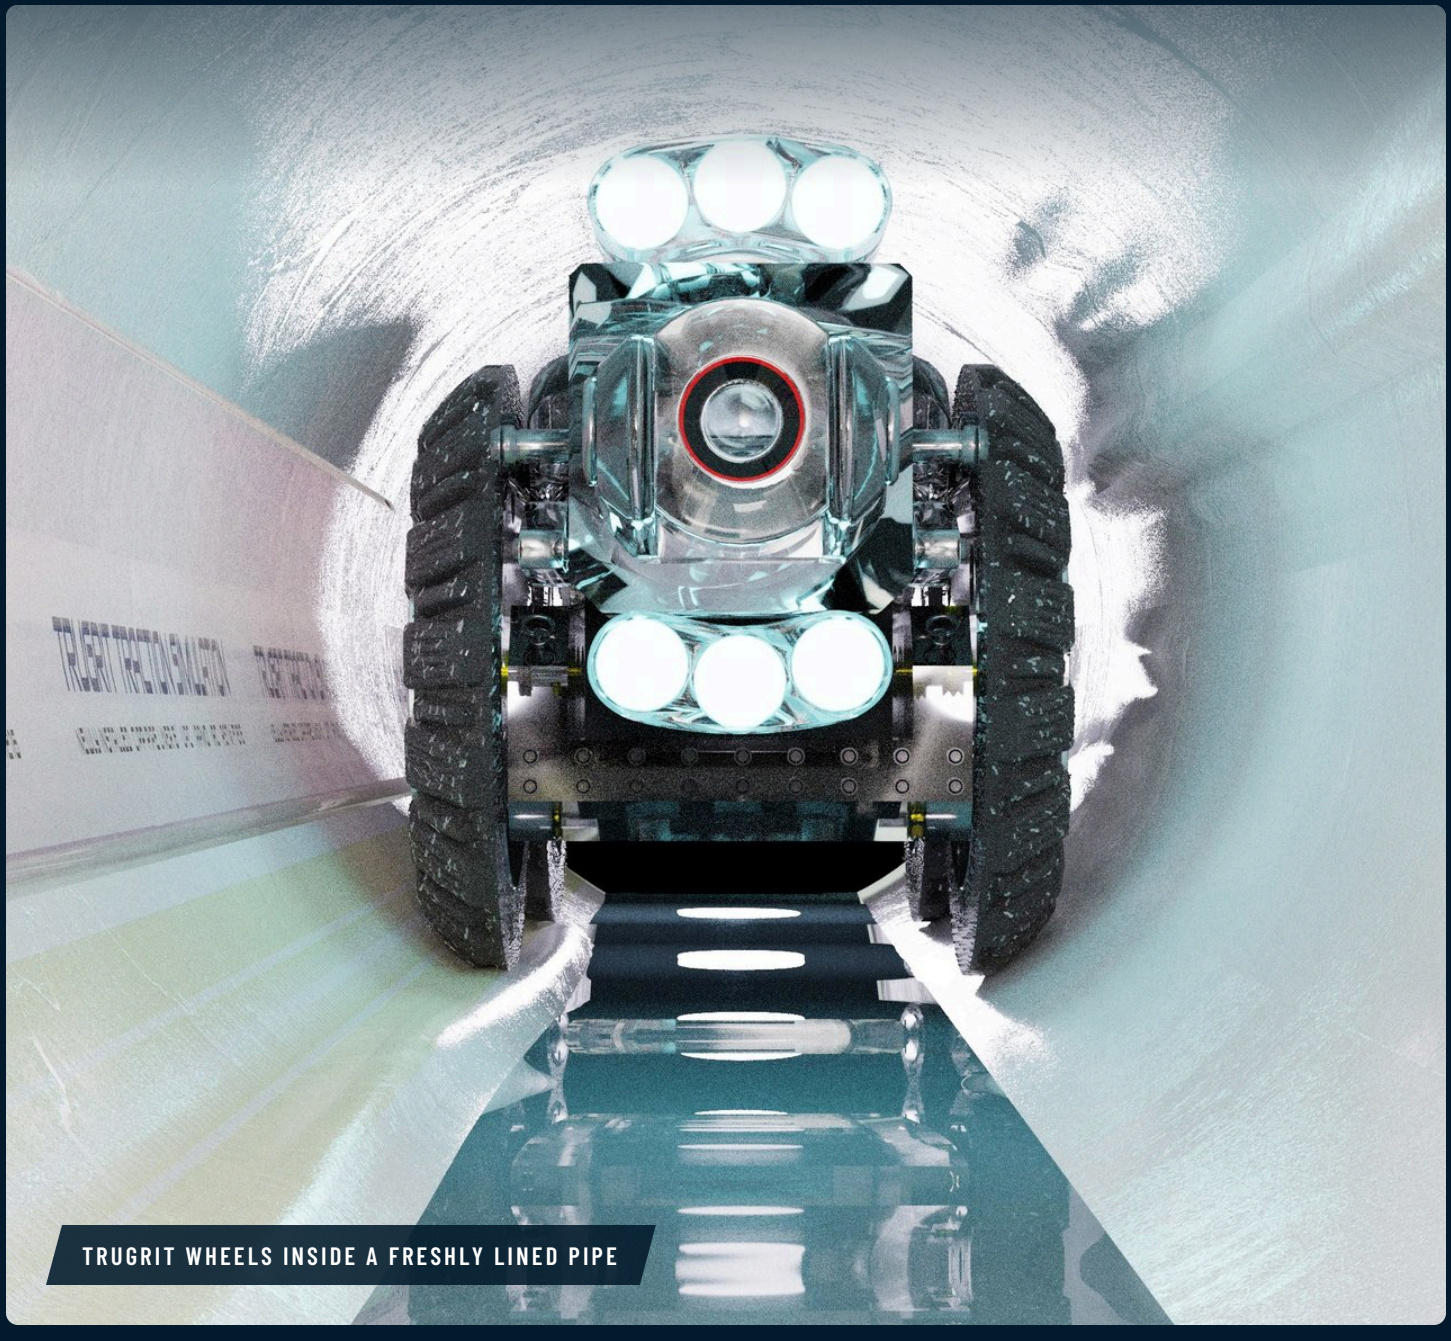

Our most affordable wheel is a durable non-gritted polymer that outlasts standard rubber.

With over 30 years of combined experience engineering and testing pipeline video inspection equipment, TruGrit Traction has developed traction products, such as gritted cleats and carbide gritted wheels, that have proven to optimize the performance of camera transporters and self-propelled lateral reinstatement cutters in varying pipe types and conditions.

PIPE-SAFE TRACTION

TRUGRIT WHEELS WILL NOT DAMAGE THE NEW PIPE LINER.

Choosing a camera transporter can be a daunting task, but choosing its carbide grit wheels is a no-brainer. TruGrit® Carbide Grit Camera Transporter Wheels fit CUES crawlers with standard CUES-style hubs, and they fit Envirosight/iPEK, IBAK/Rapid View and RST crawlers with TruGrit® Hub Adapters.

NEW

MANHOLE INSPECTION CAMERA

SEE EVERYTHING. MISS NOTHING.

Manhole 8K is a pole-mounted GoPro MAX 2 inspection system built specifically for confined-space environments. It is the only confined-space inspection camera on the market that captures true 8K video. Its ultra-high-definition 360° footage is formatted for AI-driven defect-coding platforms like SewerAI and other advanced analysis tools.

IN THE KIT

- GoPro MAX 2 360 camera
- Two 775-lumen panoramic light packs with 70-minute runtime
- Pole mount for Jameson-style snap-lock poles

Manhole 8K, pole included

OUR TRACKS FIT ARIES, CUES AND SUBSITE.

TRACKS & TIRES

We carry gritted STEEL cleats, treaded tracks, chain parts, tires, tubes and rims.

FEATURED PRODUCT

TRUGRIT® STEEL COMBO TRACKS

TruGrit® STEEL Combo Tracks are the best bang for the buck, with the best traction and longest wear life of any tracks we sell. Their softer rubber cleats outlast standard rubber cleats, and a handful of solid STEEL cleats coated with tungsten carbide grit on each side cuts through the grease to get you to that last manhole.

- **Nickel chain resists corrosion and stretching.**
- **Custom lengths are available upon request.**
